

Get the "GOOP" out of your Ink Room!

Introducing the

SLICK SCOOP™

Slick Scoop™ is the best ink handling scoop the screen printing industry has to offer!

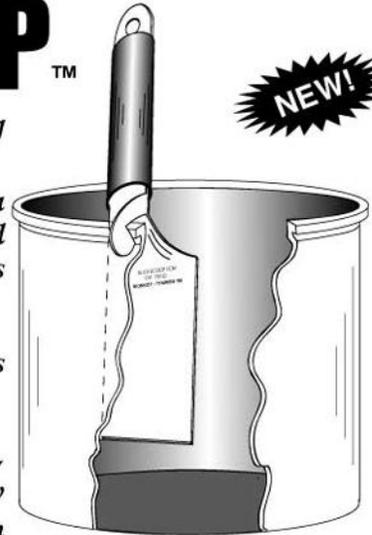

The Slick Scoop™ is made from rigid aluminum with a polyethylene handle for a combination of easy clean-up & rugged durability. You won't need to replace this tool from gouged edges or rusty metal!

In fact about the only likely reason you will need replacements are if you lost it, or decide you need another & another...

Clean Hands! Another great benefit of the Slick Scoop™, accomplished with the unique Monkey Thumbs™. The Monkey Thumbs™ allow the user to hang the scoop inside the bucket, on the outer rim & to lift the bucket by its handle without getting your hands on the messy bucket handle.

Clean Hands mean less time washing hands & more time printing. In addition, less fingerprints on garments & less money spent on spot cleaning chemicals

Printers love the Slick Scoop™. The 3" blade will scoop large amounts of even thick problem inks without bending like other scoops will.
